LANCASTER PRESS, INC., LANCASTER, PA.

INDEX TO VOLUME 277

January–June, 1964

SUBJECT INDEX

Entries with (A) are Advances in Science and Technology. Papers are listed under subject headings, with authors' names in parentheses following the title of the paper. Authors are listed with titles of their papers in alphabetical order in the Author Index.

A

Aeronautics. Small airport beacon developed, 371(A)

Aiken, Howard Hathaway: Wetherill Medal, 175

Air line shows new switching system, 297(A)

Alloys. New ductile magnetic alloy has highest known remanence, 370(A)

Amplifiers. New laser amplifier, 370(A)

Analysis of frost phenomena on a cryo-surface, 293(A)

Antennas. New sensitive radar antenna, 371(A)

Approximation. Matching of initial behavior in time domain approximation (Liu), 107

Armored glass sight sections for piping systems, 180(A)

Astrophysics. Mathematical model devised on origin of solar winds, 621(A)

Astrophysics. New evidence of water vapor on Venus, 622(A)

Atomic energy. The next ten years in atomic energy development (Cockcroft), 1

Atomic structure detection. New tool for exploring atomic structure, 507(A)

Automatic nautical navigator, 178(A)

Automation. Air line shows new switching system, 297(A)

Automation. Automatic nautical navigator, 178(A)

Automation. Computer produces engineering designs, 290(A)

Automation. Electronic eye system detects nuclear explosions, 182(A)

Automation. New drafting machine produces high quality graphic display, 509(A)

Automation. Printed circuit card tester, 378(A)

Automaton. The memory orders of states of an automaton (Liu), 37

B

Bandpass processes. Pre-envelopes of nonstationary Bandpass Processes (Urkowitz), 31

Beacons. Small airport beacon developed, 371(A)

Beams. Application of integral equations to the flexural vibration of a wedge with rotary inertia and shear (Lee and Bisshopp), 327

Beams. Mathematical technique for evaluating optical systems, 513(A)

Bell, Persa R.: Longstreth Medal, 400

Biology. New high resolution electron microscope for biologists, 298(A)

Boiling water reactor. Nuclear superheat concept, 94(A)

Book Reviews

Aarons, Jules, (edited by): Radio astronomical and satellite studies of the atmosphere, 282

Adair R. K. & E. C. Fowler: Strange particles, Tracts on Physics and astronomy no. 15, 190

Alt, F. L. and Rubinoff, M. (edited by): Advances in computers, Volume 4, 366

Arbib M. A.: Brains, machines and mathematics, 368

Barrington A. E.: High vacuum engineering, 105

Bates R. G.: Determination of pH theory and practice, 620

Bauman H. Carl: Fundamentals of cost engineering in the chemical industry, 505

Benfey O. T. (edited by): Classics in theory of chemical combination, Classics of Science, Vol. I., 106

Benedek, G. B.: Magnetic resonance at high pressure; Interscience tracts on physics and astronomy, Number 24, 106

Braun E. L.: Digital computer design, logic, circuitry and synthesis, 193

Wilkinson, J. H.: Rounding errors in algebraic processes, 620
Wilson, R.: The nucleon-nucleon interaction: experimental and phenomenological aspects, No. 16, Interscience tracts on physics and astronomy, 498
Boron hydride synthesis. Fluorinated boron hydride synthesized, 509(A)
Boundary layer. Elasto-plastic medium containing a cylindrical cavity under uniform internal pressure (Bhargava and Sharma), 422
Breakthrough of solid rocket flexibility, 182(A)
Brown Medal: Louis I. Kahn, 516
Business men in public affairs. Industrial statesmanship in a changing world (McCabe), 166

C

Calcination of radioactive liquid wastes, 380(A)

Calcination of wastes. Calcination of radioactive liquid wastes, 380(A)
Calorimeter. Calorimeter for measuring heat transfer, 291(A)
Calorimeter for measuring heat transfer, 291 (A)
Candela adopted as name of unit of luminous intensity, 289(A)
Candela. Candela adopted as name of unit of luminous intensity, 289(A)
Carbon suboxide structure. Carbon suboxide structure proven linear, 379(A)
Carbon suboxide structure proven linear, 379(A)
Celestial mechanics. Statistical radar estimate of the lunar surface roughness (Hayre) 197
Ceramic hydrogen diode withstands hard radiation, 510(A)
Ceramic tube. Ceramic hydrogen diode withstands hard radiation, 510(A)
Chalmers, Bruce: Clamer Medal, 400
Chemistry. Fluorinated boron hydride synthesized, 509(A)
Circuit card tester. Printed circuit card tester, 378(A)
Circuit theory. Interwoven redundant logic (Pierce), 55
Circuitry. Low cost, low capacitance glass-dielectric capacitor, 512(A)
Clamer Medal: Bruce Chalmers, 400
Coils. High magnetic field achieved in electric power research, 296(A)
Committee on Science and the Arts
Abstract of meetings: December 11, 1963, 87; January 8, 1964, 175; February 12, 1964, 302; March 11, 1964, 400; April 8, 1964, 516; May 13, 1964, 627
Communication network. Generating formulas for the number of trees in a graph (Bedrosian), 313
Communications. Computerized commercial telegraph system, 371(A)
Communications. Experimental transmission system designed for high-speed facsimile, 508(A)
Complex variables. On two-dimensional fluid motion through a spout composed of four plane walls (Yeh), 256
Computer control systems. Optimal synthesis of linear pulse-width-modulated computer-controlled systems (Murphy and Meksawan), 128
Computerized commercial telegraph system, 371(A)
Computer logic. Interwoven redundant logic (Pierce), 55
Computer produces engineering designs, 290(A)
Computers. Computer produces engineering designs, 290(A)
Computers. Core memory device, 294(A)
Computers. New computer mass memory system, 377(A)
Computers. New direct accounting computer, 376(A)
Computers. Voltage-current calibrator, 290(A)
Continuous functions. The Laplace transform of the sectionally-continuous derivative of a sectionally-continuous function (Rasof), 119
Control systems. A contribution to the transform calculus used in the synthesis of control systems (Puri and Weygandt), 337
Control systems. Optimal control of discrete systems with constrained inputs (Sarachik and Kranc), 237
Control systems. Optimum recovery of a continuous signal from two discrete channels (Hung), 428
Core memory device, 294(A)
Corson, Bolton L.: Longstreth Medal, 400
Creep analysis. A power-function creep analysis for rotating solid disks having variable thickness and temperature (Ma), 593
Cresson Medal: Richard V. Southwell, 302
Cryogenic storage system for space vehicles 98(A)
Cryogenics. Analysis of frost phenomena on a cryo-surface, 293(A)
Cryogenics. Cryogenic storage system for space vehicles, 98(A)
Cryogenics. Cryosorption system for vacuum pumping, 623(A)
Cryogenics. Cryo tank for space, 184(A)
Cryogenics. Purity determination by dielectric cryometry, 374(A)
Cryogenics. Simple biological freezer provides controlled-rate cryogenic cooling, 95(A)
Cryosorption system for vacuum pumping, 623(A)
Cryo Tank for space, 184(A)
Crystals. New laser emits photons and generates phonons in crystal, 92(A)

Cylindrical cavity under pressure. Elastoplastic medium containing a cylindrical cavity under uniform internal pressure (Bhargava and Sharma), 422
Cylindrical shells. Outer and inner bounds on tresca limit loads of cylindrical shells (Lee and Thorn), 517

D

Data processing. New direct accounting computer, 376(A)
D. C. Motor. New D. C. motor with "fingertuning" performance adjustment, 296(A)
Device to automatically control atmosphere, 183(A)
Digital computer. Voltage-current calibrator, 290(A)
Discrete optimal systems. Equivalence and optimal strategies for some minimum fuel discrete systems (Polak), 150
Drafting machine. New drafting machine produces high quality graphic display, 509(A)
Doppler. Unique doppler current and direction meter, 375(A)
Doppler radar system. New optical doppler radar system, 624(A)
Dual-cavity laser. New dual cavity laser, 184(A)
Dynamic pulsating loads. The dynamic stability of a uniform straight column excited by a pulsating load (Pipes), 534

E

Economics. Industrial statesmanship in a changing world (McCabe), 166
Education. The scientist and society (Haworth), 382
Electrical engineering. A contribution to the transform calculus used in the synthesis of control systems (Puri and Weygandt), 337
Electrical generating device increases power density, 378(A)
Electromagnetic coil. High magnetic field achieved in electric power research, 296(A)
Electromechanical transducer. Special electromechanical transducer, 90(A)
Electron beams. Multistaged low-voltage electron guns, 186(A)
Electron gun. Multistaged low-voltage electron guns, 186(A)
Electron microscope. New high resolution electron microscope for biologists, 298(A)
Electronic eye detector. Electronic eye system detects nuclear explosion, 182(A)
Electronic eye system detects nuclear explosions, 182(A)
Electronic stethoscope diagnoses motor troubles, 506(A)
Electronic stethoscope. Electronic stethoscope diagnoses motor troubles, 506(A)
Electrostatics. On two-dimensional fluid motion through a spout composed of four plane walls (Yeh), 256
Elliptic boundary problems. On the numerical solution of problems allowing mixed boundary conditions (Greenspan), 11
Energy storage. New superconducting energy storage system, 180(A)
Euler transforms. Rotational coordinates (Rongved and Fletcher), 414
Evaporation. 60-sq.-ft., all-glass climbing film evaporator, 180(A)
Experimental transmission system designed for high-speed facsimile, 508(A)
Extrusion. Some considerations of the mechanics of hydrostatic extrusion (Rozner and Faupel), 217

F

Fins. Nonlinear fin heat transfer (Cobble), 206
Flight simulator. Rotational flight simulator for astronaut training, 183(A)
Fluorinated boron hydride synthesized, 509(A)
Foaming polymers. New technique for foaming polymers, 181(A)
The Franklin Institute
Committee on Science and the Arts. *See* main index
Journal of The Franklin Institute. *See* main index
Library. *See* main index
Meetings. *See* main index
Membership roll of honor, 395

G

Galvanostalametry: Electrochemical phenomena detector, 187(A)
Gas laser. New triode laser, 291(A)
Gauges. Calorimeter for measuring heat transfer, 291(A)

Gauges. Unique hot/cold strip width gauge provides non-contact measurement, 185(A)
Glass. Armored glass sight sections for piping systems, 180(A)
Glass. Second stratoscope II flight uses fused silica mirror, 185(A)
Glass-ceramic resistor. New pneumatic resistor made of glass-ceramic, 295(A)
Glass-dielectric capacitor. Low cost, low capacitance glass-dielectric capacitor, 512(A)
Glass evaporator. 60-sq.-ft., all-glass climbing film evaporator, 180(A)
Government. The scientist and society (Haworth), 382
Gravity. Gravity gradient stabilization system successfully flown, 381(A)
Gravity gradient stabilization system successfully flown, 381(A)

H

Heat transfer. Nonlinear fin heat transfer (Cobble), 206
Helium-neon gas laser. New helium-neon gas laser, 621(A)
Henderson Medal: William K. MacCurdy, 516
Henderson Medal: W. E. Thomford, 516
High magnetic field achieved in electric power research, 296(A)
High-speed facsimile system. Experimental transmission system designed for high-speed facsimile, 508(A)
Hydrodynamic stability. Stability of a viscous flow between two rotating coaxial cylinders (Yu and Sun), 140
Hydrogenation. New process for the hydrogenation of pyrolytic gasoline, 184(A)
Hydrogen thryratron. New hydrogen thyratron, 298(A)
Hydrogen tubes. New hydrogen-filled diode tube, 294(A)
Hydrostatic extrusion. Some considerations of the mechanics of hydrostatic extrusion (Rozner and Faupel), 217

I

Incompressible flow. On two-dimensional fluid motion through a spout composed of four plane walls (Yeh), 256
Inequalities of one-port driving functions. On the "shape" of one-port driving functions (Brown and Reed), 566
Infrared. Carbon suboxide structure proven linear, 379(A)
Infrared. New infrared wide-angle detector, 93(A)
Infrared detector. New infrared detector, 624(A)
Instrumentation. Electronic stethoscope diagnoses motor troubles, 506(A)
Instrumentation. Low-cost ratemeter for laboratories, 514(A)
Instrumentation. New tool for exploring atomic structure, 507(A)
Instrumentation. Unique doppler current and direction meter, 375(A)
Insulating tape. New insulating tape, 97(A)
Integral equations. Application of integral equations to the flexural vibration of a wedge with rotary inertia and shear (Lee and Bisshopp), 327
Interplanetary acoustics. Statistical radar estimate of the lunar surface roughness (Hayre), 197

J

Journal of The Franklin Institute
Publications received: 192, 505

K

Kahn, Louis I.: Brown Medal, 516
Kryloff and Bogoliuboff method. Variation of parameters and the method of Kryloff and Bogoliuboff (Rasof), 266

L

Laplace transform. A contribution to the transform calculus used in the synthesis of control systems (Puri and Weygandt), 337
Laplace Transform. The Laplace transform of the sectionally-continuous derivative of a sectionally-continuous function (Rasof), 119
Largest sample of important isotope of thorium-uranium fuel cycle isolated, 506(A)
Laser beams drill holes, 96(A)
Laser used in atomic absorption spectroscopy, 288(A)
Lasers. Laser beams drill holes, 96(A)
Lasers. Laser used in atomic absorption spectroscopy, 288(A)
Lasers. New dual-cavity laser, 184(A)
Lasers. New helium-neon gas laser, 621(A)
Laser. New laser amplifier, 370(A)

Lasers. New laser emits photons and generates phonons in crystal, 92(A)
Lasers New "laser lever" increases power output, 511(A)
Lasers. New miniature gas laser, 178(A)
Lasers. New triode laser, 291(A)
Lasers. Spectrometer for laser analysis, 372(A)
Lateral oscillations. Free lateral oscillations of a supported grillage (Wah), 349
Library of Congress. New library information service, 90(A)
Library information service. New library information service, 90(A)
Library of The Franklin Institute
New Books: 88, 176, 300, 393, 515, 626
Light beams. Laser beams drill holes, 96(A)
Linear graph theory. Generating formulas for the number of trees in a graph (Bedrosian), 313
Loads. Elastic-plastic analysis of centrally clamped annular plates under uniform loads (French), 575
Longstreth Medal: Persa R. Bell, 400
Longstreth Medal: Bolton L. Corson, 400
Longstreth Medal: Ernest Wildhaber, 302
Low cost, low capacitance glass-dielectric capacitor, 512(A)
Low-cost ratemeter for laboratories, 514(A)
Low temperature. Analysis of frost phenomena on a cryo-surface, 293(A)
Low temperature. Purity determination by dielectric cryometry, 374(A)
Low temperature. Simple biological freezer provides controlled-rate cryogenic cooling, 95(A)
Lunar surface. Statistical radar estimate of the lunar surface roughness (Hayre), 197

M

MacCurdy, William K.: Henderson Medal, 516
Magnetic fields. On the static magnetic field associated with a thin film ferromagnetic slab (Combs and Wujek), 305
Magnetic thin films. On the static magnetic field associated with a thin film ferromagnetic slab (Combs and Wujek), 305
Mass memory. New computer mass memory system, 377(A)
Mathematical model devised on origin of solar winds, 621(A)
Mathematical technique for evaluating optical systems, 513(A)
Mathematics of singularity functions. Some properties and applications of singularity functions based on the theory of distributions (Pilkey), 464
Measuring device. New ultrasonic measuring device, 294(A)
Meetings of The Franklin Institute
Minutes of Stated Meeting: December 18, 1963, 86; January 15, 1964, 173; February 19, 1964, 303; March 18, 1964, 399; April 15, 1964, 516; May 20, 1964; 627
Memory device. Core memory device, 294(A)
Memory orders of states. The memory orders of states of an automaton (Liu), 37
Metallurgy. New ductile magnetic alloy has highest known remanence, 370(A)
Metallurgy. Oxidation of nickel studies, 91(A)
Meteorology. New electronic weather vane, 373(A)
Micro-Foil tape. New insulating tape, 97(A)
Miniaturization. New miniature gas laser, 178(A)
Motors. New D. C. Motor with "fingertuning" performance adjustment, 296(A)
Müller, Erwin W.: Potts Medal, 87
Multistaged low-voltage electron guns, 186(A)

N

Nautical navigation. Automatic nautical navigator, 178(A)
Network topology. Generating formulas for the number of trees in a graph (Bedrosian), 313
New computer mass memory system, 377(A)
New D. C. motor with "fingertuning" performance adjustment, 296(A)
New direct accounting computer, 376(A)
New drafting machine produces high quality graphic display, 509(A)
New dual-cavity laser, 184(A)
New dual-target X-ray tube, 512(A)
New ductile magnetic alloy has highest known remanence, 370(A)
New "electric flux pump," 625(A)
New electronic weather vane, 373(A)
New evidence of water vapor on Venus, 622(A)
New helium-neon gas laser, 621(A)
New high resolution electron microscope for biologists, 298(A)
New "Hot Electron" propulsion technique, 373(A)

New hydrogen-filled diode tube, 294(A)
New hydrogen thyratron, 298(A)
New infrared detector, 624(A)
New infrared wide-angle detector, 93(A)
New insulating tape, 97(A)
New laser amplifier, 370(A)
New laser emits photons and generates phonons in crystal, 92(A)
New "laser lever" increases power output, 511(A)
New library information service, 90(A)
New method of thin film analysis uses xenon flash lamp, 511(A)
New miniature gas laser, 178(A)
New optical device "sees" and "reads," 288(A)
New optical doppler radar system, 624(A)
New pneumatic resistors made of glass-ceramic, 295(A)
New process for the hydrogenation of pyrolytic gasoline, 184(A)
New satellite space photography system, 97(A)
New sensitive radar antenna, 371(A)
New superconducting energy storage system, 180(A)
New technique for foaming polymers, 181(A)
New technique of niobium film production, 375(A)
New tool for exploring atomic structure, 507(A)
New torsion tester for polymers, 95(A)
New triode laser, 291(A)
New types of ultrasonic transducers operate in 100- to 1000-mc range, 513(A)
New ultrasonic measuring device, 294(A)
New versatile power supplies, 295(A)
Niobium films. New technique of niobium film production, 375(A)
Nonlinear fin heat transfer (Cobble), 206
Nuclear energy. New ultrasonic measuring device, 294(A)
Nuclear Energy. Nuclear superheat concept, 94(A)
Nuclear energy. The next ten years in atomic energy development (Cockcroft), 1
Nuclear fuel. Largest sample of important isotope of thorium-uranium fuel cycle isolated, 506(A)
Nuclear superheat concept, 94(A)
Numerical analysis. On the numerical solution of problems allowing mixed boundary conditions. (Greenspan), 11
Numerical patterns. On the "shape" of one-port driving functions, (Brown and Reed), 566

O

One-port driving functions. On the "shape" of one-port driving functions (Brown and Reed), 566
Optical device. New optical device "sees" and "reads," 288(A)
Optics. Mathematical technique for evaluating optical systems, 513(A)
Optics. New optical device "sees" and "reads," 288(A)
Optics. Unique hot/cold strip width gauge provides non-contact measurement, 185(A)
Optimal control. Equivalence and optimal strategies for some minimum fuel discrete systems (Polak), 150
Optimal control theory. Optimal control of discrete systems with constrained inputs (Sarachik and Kranc), 237
Optimal discrete systems. Optimal control of discrete systems with constrained inputs (Sarachik and Kranc), 237
Optimal signal recovery. Optimum recovery of a continuous signal from two discrete channels (Hung), 428
Optimal synthesis. Optimal synthesis of linear pulse-width-modulated computer-controlled systems (Murphy and Meksawan), 128
Optimal synthesis. Synthesis of discrete systems subject to control-signal saturation (Tou), 401
Oscillations of a uniform straight column The dynamic stability of a uniform straight column excited by a pulsating load (Pipes), 534
Oxidation of nickel studies, 91(A)
Oxygen adsorption. Oxidation of nickel studies, 91(A)

P

Parameters. Variation of parameters and the method of Kryloff and Bogoliuboff (Rasof), 266
Partial differential equations. On the numerical solution of problems allowing mixed boundary conditions (Greenspan), 11
Personnel rescue beacons, 91(A)

Phenomena Detector. Galvanostalametry: Electrochemical phenomena detector, 187(A)
Phonons. New laser emits phonons and generates phonons in crystal, 92(A)
Photography. New satellite space photography system, 97(A)
Plastic flow. Some considerations of the mechanics of hydrostatic extrusion (Rozner and Faupel), 217
Plasticity. Elastic-plastic analysis of centrally clamped annular plates under uniform loads (French), 575
Plasticity. Elasto-plastic medium containing a cylindrical cavity under uniform internal pressure (Bhargava and Sharma), 422
Plastics. New technique for foaming polymers, 181(A)
Plates. Elastic-plastic analysis of centrally clamped annular plates under uniform loads (French), 575
Pneumatic resistors. New pneumatic resistors made of glass-ceramic, 295(A)
Polymers. New torsion tester for polymers, 95(A)
Potts Medal: Erwin W. Müller, 87
Power converter. Special electromechanical transducer, 90(A)
Power device. Electrical generating device increases power density, 378(A)
Power functions. A power-function creep analysis for rotating solid disks having variable thickness and temperature (Ma), 593
Power supplies. New versatile power supplies, 295(A)
Pre-envelopes of random processes. Pre-envelopes of nonstationary bandpass processes (Urkowitz), 31
Printed circuit car tester, 378(A)
Propulsion. New "hot electron" propulsion technique, 373(A)
Pumps. New "electric flux pump," 625(A)
Purity determination by dielectric cryometry, 374(A)

R

Radar. New sensitive radar antenna, 371(A)
Radiation. Scintillographic inspection method, 95(A)
Radiation detection. New infrared detector, 624(A)
Radial loadings. Noncircular rings under radial load (Romano and Ranlet), 444
Radioactivity. Calcination of radioactive liquid wastes, 380(A)
Radio transmitter. Personnel rescue beacons, 91(A)
Ratemeter. Low-cost ratemeter for laboratories, 514(A)
Redundant logic. Interwoven redundant logic (Pierce), 55
Rescue beacon. Personnel rescue beacons, 91(A)
Rings. Noncircular rings under radial load (Romano and Ranlet), 444
Rocketry. Breakthrough of solid rocket flexibility, 182(A)
Rocketry. The motion of a spinner rocket inside a smoothbore launcher (Harrington and Bullock), 552
Rotating solid disks. A power-function creep analysis for rotating solid disks having variable thickness and temperature (Ma), 593
Rotational coordinates (Rongved and Fletcher), 414
Rotational flight simulator for astronaut training, 183(A)

S

Satellite detector. New infrared wide-angle detector, 93(A)
Saturating discrete systems. Synthesis of discrete systems subject to control-signal saturation (Tou), 401
Science and government. The scientist and society (Haworth), 382
Scintillographic inspection method, 95(A)
Scintillographic inspection. Scintillographic inspection method, 95(A)
Second stratoscope II flight uses fused silica mirror, 185(A)
Servotherm. New infrared wide-angle detector, 93(A)
Shells. Outer and inner bounds on tresca limit loads of cylindrical shells (Lee and Thorn), 517
Signal recovery. Optimum recovery of a continuous signal from two discrete channels (Hung), 428
Simple biological freezer provides controlled-rate cryogenic cooling, 95(A)
Singularity functions. Some properties and applications of singularity functions based on the theory of distributions (Pilkey), 464
Sixty-sq.-ft., All glass climbing-film evaporator, 180(A)

Small airport beacon developed, 371(A)
Small deflection analysis. Noncircular rings under radial load (Romano and Ranlet), 444
Smoothbore launcher. The motion of a spinner rocket inside a smoothbore launcher (Harrington and Bullock), 552
Solar collector, 91(A)
Solar studies. Mathematical model devised on origin of solar winds, 621(A)
Solid propellants. Breakthrough of solid rocket flexibility, 182(A)
Some considerations of the mechanics of hydrostatic extrusion (Rozner and Faupel), 217
Southwell, Richard V.: Cresson Medal, 302
Space craft. Device to automatically control atmosphere, 183(A)
Space photography. New satellite space photography system, 97(A)
Space science. Cryogenic storage system for space vehicles, 98(A)
Space science. Cryo tank for space, 184(A)
Space science. Device to automatically control atmosphere, 183(A)
Space science. New "hot electron" propulsion technique, 373(A)
Space science. Rotational flight simulator for astronaut training, 183(A)
Space science. Second stratoscope II flight uses fused silica mirror, 185(A)
Space science. Solar collector, 91(A)
Space technology. New optical doppler radar system, 624(A)
Special electromechanical transducer, 90(A)
Spectrometer for laser analysis, 372(A)
Spectrometer. Spectrometer for laser analysis, 372(A)
Spectroscopy. Laser used in atomic absorption spectroscopy, 288(A)
Spinner rocket motion. The motion of a spinner rocket inside a smoothbore launcher (Harrington and Bullock), 552
Stability of laminar flow. Stability of a viscous flow between two rotating coaxial cylinders (Yu and Sun), 140
Stability of viscous flow. Stability of a viscous flow between two rotating coaxial cylinders (Yu and Sun), 140
Stabilization system. Gravity gradient stabilization system successfully flown, 381(A)
Stress Analysis. Torsion of nonhomogeneous bars (Chen), 50
Superconductors. New "electric flux pump," 625(A)
Superconductors. New superconducting energy storage system, 180(A)
Switching. New "laser lever" increases power output, 511(A)
Switching system. Air line shows new switching system, 297(A)
Synthesis of discrete systems. Synthesis of discrete systems subject to control-signal saturation (Tou), 401

T

Telegraph system. Computerized commercial telegraph system, 371(A)
Theory of distributions. Some properties and applications of singularity functions based on the theory of distributions (Pilkey), 464
Thermionic convertor. Electrical generating device increases power density, 378(A)
Thin films. New technique of niobium film production, 375(A)
Thin film analysis. New method of thin film analysis uses xenon flash lamp, 511(A)
Thin film memories. On the static magnetic field associated with a thin film ferromagnetic slab (Combs and Wujek), 305
Thomford, W. E.: Henderson Medal, 516
Thorium-uranium fuel. Largest sample of important isotope of thorium-uranium fuel cycle isolated, 506(A)
Time domain approximation. Matching of initial behavior in time domain approximation (Liu), 107
Torsion. New torsion tester for polymers, 95(A)
Torsion. Torsion of non-homogeneous bars (Chen), 50
Transducers. New types of ultransonic transducers operate in 100- to 1000-mc range, 513(A)
Transistors. New versatile power supplies, 295(A)
Tresca limit loads. Outer and inner bounds on tresca limit loads of cylindrical shells (Lee and Thorn), 517
Tubes. Armored Glass sight sections for piping systems, 180(A)
Tubes. Ceramic hydrogen diode withstands hard radiation, 510(A)
Tubes. New dual-target X-ray tube, 512(A)

Tubes. New hydrogen-filled diode tube, 294(A)
Tubes. New hydrogen thyratron, 298(A)

U

Ultrasonic transducers. New types of ultrasonic transducers operate in 100- to 1000-mc range, 513(A)
Uniform grillage. Free lateral oscillations of a supported grillage (Wah), 349
Unique doppler current and direction meter, 375(A)
Unique hot/cold strip width gauge provides non-contact measurement, 185(A)
Unit measure. Candela adopted as name of unit of luminous intensity, 289(A)

V

Vacuum pumping. Cryosorption system for vacuum pumping, 623(A)
Venus water vapor. New evidence of water vapor on Venus, 622(A)
Vermilye Medal. Presentation of the Vermilye Medal, 162
Vibrations. Application of integral equations to the flexural vibration of a wedge with rotary inertia and shear (Lee and Bisshopp), 327
Vibrations. Free lateral oscillations of a supported grillage (Wah), 349
Vibrations. The dynamic stability of a uniform straight column excited by a pulsating load (Pipes), 534
Voltage-current calibrator, 290(A)

W

Weather vane. New electronic weather vane, 373(A)
Wetherill Medal: Howard Hathaway Aiken, 175
Wildhaber, Ernest; Longstreth Medal, 302

X

X-ray tube. New dual-target X-ray tube, 512(A)

AUTHOR INDEX

INDEX TO VOLUME 278

July–December, 1964

SUBJECT INDEX

Entries with (A) are Advances in Science and Technology. Papers are listed under subject headings, with authors' names in parentheses following the title of the paper. Authors are listed with titles of their papers in alphabetical order in the Author Index.

A

Adaptive control. A study of the correlation technique of generalized spectral analysis (Smith and Clement), 133

Aluminum crystals. New rare earth garnets, 156(A)

Analytical mechanics. Analytical mechanics and the analysis of linear, time-varying networks (Rohrer), 84

Anisotropic bodies. Mechanical dislocations and physical processes of anisotropic bodies (Perkins and Evan-Iwanowski), 337

Annular plates. A further note on the creep analysis of annular plates (Venkatraman, Patel and Birnbaum), 248

Asphalts. Photo-oxidation in asphalts, 71(A)

Astrophysics. Motion in a newtonian forced field modified by a general force (Magiros), 407

B

Beams. A three-dimensional elasticity solution for continuous beams (Herrmann), 75

Beam vibration. On the effect of rotatory inertia and shear in beam vibration (Hurty and Rubinstein), 124

Book Reviews

C

Celestial mechanics. Motion in a newtonian forced field modified by a general force (Magiros), 407
Cell formation stabilization. New approach in stabilizing rigid urethane foam, 156(A)
Chemical separation. Two new flocculants developed, 157(A)
Collapse loads. Collapse loads of orthotropic cylindrical shells under radial pressures (Venkatraman and Sankaranarayanan), 183
Color measurements. Filters facilitate color measurements, 70(A)
Committee on Science and the Arts
Abstract of meetings: June 10, 1964, 162; October 14, 1964, 364
Computer circuit. New radiation-resistant computer circuits, 69(A)
Computer guides Saturn I payload into orbit, 154(A)
Computers. Computer guides Saturn I payload into orbit, 154(A)
Computers. New microelectronic computer system, 68(A)
Correlation methods for generalized Fourier coefficients. A study of the correlation technique of generalized spectral analysis (Smith and Clement), 133
Creep. Creep deformations in membrane shells (Cozzarelli and Patel), 45
Creep. A further note on the creep analysis of annular plates (Venkatraman, Patel and Birnbaum), 248
Cresson Medal: Donald D. Van Slyke, 364
Crystal defects detection. New method of analyzing crystal defects, 225(A)
Crystal imperfection detector. New technique detects crystal structure imperfections, 72(A)
Crystal structure. New technique detects crystal structure imperfections, 72(A)
Cut-tree. On the relationship between the cut-tree and the fundamental cut-set of multi-terminal flow networks (Elmaghraby), 262

D

Detection device. New method of analyzing crystal defects, 225(A)
Detection device. New technique detects crystal structure imperfections, 72(A)
Discrete control systems. Optimization of discrete control systems through linear programming (Torng), 28
Distributed RC networks. The effect of shaping and loading on distributed RC networks (Ghausi and Herskowitz), 108

Dominant matrices. Dominant matrices and their application to network synthesis under topological constraints (Cederbaum), 394

E

Elasticity. Elastic stress analysis of jointed half-planes (Iyengar and Alwar), 267
Elasticity. On the axially symmetric deformation of a nonhomogeneous elastic material (Schile and Sierakowski), 327
Elasticity. A three-dimensional elasticity solution for continuous beams (Herrmann), 75
Elastodynamics. Remarks on variational principles in elastodynamics (Chen), 1
Elasto-kinetics: Response of a prestressed elastic plate strip to a moving pressure load (Reismann), 8
Electrical connector. New nonmagnetic connectors, 73(A)
Electrical engineering. Absolute iteration and the solution of transcendental equations (Kowel), 210
Electrical engineering. Some properties of physical measurements with application to system identification (Hammond), 173
Electrical engineering. Transformations in the analysis of non-uniform transmission lines (Schwartz), 163
Electric typewriters. New "selectric" typewriter, 156(A)
Emission spectrochemical analysis. New X-ray tube, 155(A)
Energy converter. New thermionic energy converter, 158(A)

F

Filters facilitate color measurements, 70(A)
Filters. Filters facilitate color measurements, 70(A)
Four new radioactivity standards issued, 70(A)
The Franklin Institute
  Committee on Science and the Arts. *See* main index
  Journal of The Franklin Institute. *See* main index
  Library. *See* main index
  Meetings. *See* main index
The Franklin Institute Laboratories
  Contributions by staff members, 227
Franklin Medal. Gregory Breit, 365
Frequency cross-over. Frequency cross-over of simply-supported circular ring segments (Nelson), 20
Fundamental cut-set. On the relationship between the cut-tree and the fundamental cut-set of multi-terminal flow networks (Elmaghraby), 262
Fused silica optics for solar simulator, 71(A)
Fused silica optics. Fused silica optics for solar simulator, 71(A)

G

Guidance control. Computer guides Saturn I payload into orbit, 154(A)

H

Half-planes. Elastic stress analysis of jointed half-planes (Iyengar and Alwar), 267
Homomorphic images. On homomorphic images of transition graphs (Yoeli and Ginzburg), 291

I

Identification problem. A study of the correlation technique of generalized spectral analysis (Smith and Clement), 133
Impulsive loadings. Transient response of a piecewise linear inelastic system to impulsive loading (Saul, Fleming and Lee), 297

J

Journal of The Franklin Institute
  Publications received: 153, 224, 361

L

Laser emits radiation at 133 microns, 159(A)
Lasers. Laser emits radiation at 133 microns, 159(A)
Lasers. Semiconductor-cooled laser achieves first all-solid-state laser system, 154(A)
Library of The Franklin Institute
  New Books, 74, 160, 226, 288, 362, 445
Lienard construction (extension of). Nonlinear analysis in the phase plane (Bickart), 256

Linear control laws. Linear control laws for singular linear systems (Sobral), 313

Linear programming. Optimization of discrete control systems through linear programming (Torng), 28

Loadings. Transient response of a piecewise linear inelastic system to impulsive loading, (Saul, Fleming and Lee), 297

M

Magnets. New powerful superconductive magnet, 157(A)

Mechanical dislocations. Mechanical dislocations and physical processes of anisotropic bodies (Perkins and Evan-Iwanowski), 337

Medal Day proceedings, 426

Meetings of The Franklin Institute
Minutes of Stated Meeting: October 21, 1964, 364; November 18, 1964, 446

Membrane shells. Creep deformations in membrane shells (Cozzarelli and Patel), 45

Microelectronic circuits. The effect of shaping and loading on distributed RC networks (Ghausi and Herskowitz), 108

Microelectronic computer. New microelectronic computer system, 68(A)

Microminiaturization. The effect of shaping and loading on distributed RC networks (Ghausi and Herskowitz), 108

Multi-terminal flow networks. On the relationship between the cut-tree and the fundamental cut-set of multi-terminal flow networks (Elmaghraby), 262

N

Network synthesis. Dominant matrices and their application to network synthesis under topological constraints (Cederbaum), 394

Network theory. The sensitivity of a traffic network (Yau), 371

New approach in stabilizing rigid urethane foam, 156(A)

New method of analyzing crystal defects, 225(A)

New microelectronic computer system, 68(A)

New nonmagnetic connectors, 73(A)

New powerful superconductive magnet, 157(A)

New radiation-resistant computer circuits, 69(A)

New radioactivity standards. Four new radio-activity standards issued, 70(A)

New rare earth garnets, 156(A)

New "selectric" typewriter, 156(A)

New technique detects crystal structure imperfections, 72(A)

New thermionic energy converter, 158(A)

Newtonian forced field. Motion in a newtonian forced field modified by a general force (Magiros), 407

New X-ray tube, 155(A)

Nonhomogeneous elastic material. On the axially symmetric deformation of a nonhomogeneous, elastic material (Schile and Sierakowski), 327

Nonlinear analysis, graphical methods. Nonlinear analysis in the phase plane (Bickart), 256

Nonlinear differential equations. Free resonant oscillations of a conservative two-degree-of-freedom system (Struble and Warmbrod), 195

Nonmagnetic connectors. New nonmagnetic connectors, 73(A)

Non-uniform transmission lines. Transformations in the analysis of non-uniform transmission lines (Schwartz), 163

Nuclear energy. Oil industry helps solve radioactive waste problem, 69(A)

Nuclear Physics. Pursuit of nuclear physics (Breit), 365

O

Oil industry helps solve radioactive waste problem, 69(A)

Optics. Fused silica optics for solar simulator, 71(A)

Optimization. Optimization of discrete control systems through linear programming (Torng), 28

Orthotropic cylindrical shells. Collapse loads of orthotropic cylindrical shells under radial pressures (Venkatraman and Sankaranarayanan), 183

Oxide films. Silicon dioxide films grown at low temperatures, 68(A)

P

Phase plane graphical analysis. Nonlinear analysis in the phase plane (Bickart), 256

Photo-oxidation in asphalts, 71(A)

Photo-oxidation. Photo-oxidation in asphalts, 71(A)

Physical measurements. Some properties of physical measurements with application to system identification (Hammond), 173

R

Radiation. Satellite reveals new radiation facts, 225(A)

Radiation emission. Laser emits radiation at 133 microns, 159(A)

Radiation resistance. New radiation-resistant computer circuits, 69(A)

Radioactive waste. Oil industry helps solve radioactive waste problem, 69(A)

Radioactivity standards. Four new radioactivity standards issued, 70(A)

Rare earth garnets. New rare earth garnets, 156(A)

Resonant oscillations. Free resonant oscillations of a conservative two-degree-of-freedom system, (Struble and Warmbrod), 195

Rings. Frequency cross-over of simply-supported circular ring segments (Nelson), 20

Rotatory inertia. On the effect of rotatory inertia and shear in beam vibration (Hurty and Rubinstein), 124

S

Satellites. Satellite reveals new radiation facts, 225(A)

Satellite reveals new radiation facts, 225(A)

Semiconductor-cooled laser achieves first all-solid state laser system, 154(A)

Semon, Waldo L.: Elliott Cresson Medal, 162

Shear. On the effect of rotatory inertia and shear in beam vibration (Hurty and Rubinstein), 124

Shearing interferometer. Wave front shearing interferometer, 158(A)

Shells. Collapse loads of orthotropic cylindrical shells under radial pressures (Venkatraman and Sankarananarayanan), 183

Shells. Creep deformations in membrane shells (Cozzarelli and Patel), 45

Silicon dioxide films grown at low temperatures, 68(A)

Silicon dioxide films. Silicon dioxide films grown at low temperatures, 68(A)

Singular linear systems. Linear control laws for singular linear systems (Sobral), 313

Solid mechanics. Response of a prestressed elastic plate strip to a moving pressure load (Reismann), 8

Solid-state electronics. New powerful superconductive magnet, 157(A)

Solid-state laser. Semiconductor-cooled laser achieves first all-solid-state laser system, 154(A)

Solids. Irradiation into transparent solids and the thermal trap effect (Cobble), 383

Solids. Two new flocculants developed, 157(A)

Stability. Analytical mechanics and the analysis of linear, time-varying networks (Rohrer), 84

Stress. A three-dimensional elasticity solution for continuous beams (Herrmann), 75

Stress analysis. Elastic stress analysis of jointed half-planes (Iyengar and Alwar), 267

System identification. Some properties of physical measurements with application to system identification (Hammond), 173

Systems containing double drivers. Systems of one-port linear components containing through-across type drivers (Blackwell and Grigsby), 237

Systems containing through-across drivers. Systems of one-port linear components containing through-across type drivers (Blackwell and Grigsby), 237

T

Thermal trap effect. Irradiation into transparent solids and the thermal trap effect (Cobble), 383

Thermionic energy converter. New thermionic energy converter, 158(A)

Through-across type drivers. Systems of one-port linear components containing through-across type drivers (Blackwell and Grigsby), 237

Time-varying networks. Analytical mechanics and the analysis of linear time-varying networks (Rohrer), 84

Traffic network. The sensitivity of a traffic network (Yau), 371

Transcendental equations. Absolute iteration and the solution of transcendental equations (Kowel), 210

Transistor circuit. New radiation-resistant computer circuits, 69(A)

Transition graphs. On homomorphic images of transition graphs (Yoeli and Ginzburg), 291

Transmission lines. Transformations in the analysis of non-uniform transmission lines (Schwartz), 163

Transparent solids. Irradiation into transparent solids and the thermal trap effect (Cobble), 383

Tristimulus filters. Filters facilitate color measurements, 70(A)

Two-degree-of-freedom system. Free resonant oscillations of a conservative two-degree-of-freedom system (Struble and Warmbrod), 195

Two new flocculants developed, 157(A)

Typewriters. New "selectric" typewriter, 156(A)

U

Urethane foam. New approach in stabilizing rigid urethane foam, 156(A)

V

Van Slyke, Donald D.: Elliott Cresson Medal, 364

Variational principles. Remarks on variational principles in elastodynamics (Chen), 1

Vibration. Frequency cross-over of simply-supported circular ring segments (Nelson), 20

Vibration. Remarks on variational principles in elastodynamics (Chen), 1

W

Wave front interferometer. Wave front shearing interferometer, 158(A)

Wave front shearing interferometer, 158(A)

Wave propagation. Response of a prestressed elastic plate strip to a moving pressure load (Reismann), 8

Wilson, Robert R.: Elliott Cresson Medal, 162

X

X-ray tube. New X-ray tube, 155(A)

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced.
